EXPERIENCE

Software Developer

Nov 2024 – June 2026

koolio.ai

Remote, India

- Led refactor of Koolio's UI application from internal prototype to production beta in React and TypeScript, shipping 8 screens to over **500 beta users**; authored a reusable component library adopted by 8 engineers, reducing new-screen build time by **80% (from 15 days to 3 days)**.
- Prototyped and co-developed an **RSS-based** publishing workflow in collaboration with the backend team, enabling creators to distribute audiobooks and podcasts to third-party platforms such as YouTube, Apple Podcasts and Spotify.
- Built an interactive product demo in React and WaveSurfer.js, embedded via iframe on the marketing site, letting visitors try core audio workflows without an account; converted **25% more visitors** into signups by giving them hands-on product experience pre-registration.
- Built an **offline-first persistence** layer for the audio editor, preserving the Redux state and audio data into **IndexedDB**; on re-login, a liveness check reconciles local state against the backend and syncs trailing operations, recovering in-progress edits lost to session timeouts or unexpected app closures.

Software Developer

Jun 2023 – Nov 2024

MyCaptain

Bengaluru, India

- Led the development of an in-app Jobs Board that replaced fragmented Google Form based job listings and submissions. Centralized job details, application rounds, and company feedback within the platform, significantly improving user trust and visibility and resulting in a **2x increase** in job applications.
- Developed a lightweight, production-aligned demo application featuring core content flows and completion certificates for sales-led product demos, enabling sales representatives to showcase real user journeys and contributing to a **9% increase in the likely-to-buy funnel**.
- Collaborated with the Design team to revamp the LMS of web app by improving visibility of key course elements (live classes, projects, etc.) and replacing the static notice board with an integrated course calendar resulting in an **18% increase** in class attendance and timely project submissions.
- Maintained Sentry for real-time error monitoring and performance analytics, contributing to a **16% reduction** in page crashes and achieving **99% overall** uptime.

Associate Software Developer

Dec 2022 – Jun 2023

MyCaptain

Bengaluru, India

- Led the frontend development of a trial access feature, delivering a responsive and user-friendly interface that contributed to a **33% increase** in student onboarding.
- Developed a project submission card that directed users to the submissions page, resulting in a **14% increase** in the visibility of active projects.

PROJECTS

Mentee Web-App | *Next.js, TypeScript, Tailwind CSS, Ant-Design, GraphQL*

- Responsible for maintaining and updating a web application that serves as a learning/placement platform for users. Utilized GraphQL, Next.js, Tailwind, and Ant Design (Antd) to create a seamless and user-friendly experience.

Airbnb Clone | *Next.js, TypeScript, Tailwind CSS, ShadCn UI, Prisma, Supabase, CRUD, Server Actions, Clerk Auth*

- A full-stack short-term rental marketplace inspired by Airbnb. Users can discover properties, book stays, pay securely, manage listings and leave reviews all in one application. Built as a production-style learning project with real integrations for authentication, payments, image storage, and analytics.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux, React Context API, Tailwind CSS, Material UI, Ant Design, SCSS/Sass, Framer Motion

Backend Technologies: Node.js, Express.js, REST APIs, GraphQL (Apollo Client)

Cloud & DevOps: Google Cloud Platform (GCP), AWS (S3)

Storage: IndexedDB, Local Storage, Redis, Prisma ORL

Developer Tools: Git, GitHub, VS Code, Chrome DevTools, Postman, Insomnia, Figma,

AI Developer Tools: Cursor, Claude Code, Open AI Codex

Concepts: Responsive Design, Component Architecture, State Management, API Integration, Authentication

EDUCATION

SRM Institute of Science & Technology

Bachelor of Technology in Computer Science & Engineering

Jul 2019 – Jun 2023

(GPA: 9.26/10.0)
